Faustel and Jagenberg Converting Solutions continue Strategic Collaboration at The Battery Show North America 2026

Detroit, Michigan, August 18, 2026 - Faustel, a leader in web coating and winding technology, and Jagenberg Converting Solutions GmbH, a recognized provider of innovative converting solutions for the battery, fuel cell, and electrolyzed markets, will continue their strategic collaboration with a joint exhibition at **The Battery Show North America 2026**.

The two industry leaders will showcase integrated turnkey manufacturing solutions from **October 13-15, 2026, in Detroit, Michigan**. Visitors are invited to meet experts from both companies at **Booth 5331** to learn how their combined technologies can help improve process efficiency, product quality, and material utilization.

The ongoing collaboration brings together Jagenberg Converting Solutions' experience in innovative converting systems with Faustel's expertise in precise, high-performance web machinery. Together, the companies offer a comprehensive portfolio for demanding battery and energy applications, including **slot die coating, drying, calendering, zero-waste winding, and slitting**.

As battery and energy storage manufacturers continue to scale production and optimize their processes, the need for reliable, synchronized equipment across all platforms is increasing. Faustel and Jagenberg Converting Solutions support customers by offering technologies from pilot scale to industrial scale and can effectively coordinate turnkey installations.

“Our continued collaboration with Jagenberg Converting Solutions enables us to bring together complementary engineering expertise and provide customers with a broader, yet more complete response to their production challenges,” said Chris Clark, Vice President of Sales and Technology at Faustel. “By combining precision web machinery with integrated, technology

forward converting solutions, we help manufacturers pursue greater efficiency, consistency, and reliability across their battery and energy production processes.”

“The energy segment remains a key area for innovation and investment, and customers are looking for partners who can support increasingly complex projects,” said Daniel Schmidt, Managing Director of Jagenberg Converting Solutions GmbH. “Together with Faustel, we deliver the scalable, high-efficiency production solutions manufacturers need to succeed. A highlight at this year’s Battery Show will be the unveiling of our joint tabletop calender, which will help us live up to our guiding principle of “from pilot to industrial scale” in this area as well. Industrial calenders are already part of Faustel/Jagenberg’s product portfolio.”

Visitors to Booth 5331, will be able to discuss their specific production requirements with specialists from Faustel and Jagenberg Converting Solutions. The team will demonstrate how their combined capabilities help manufacturers streamline operations, reduce material waste, and hit critical production targets in the rapidly evolving battery and energy storage markets.

About Faustel

Faustel is a global leader in custom web converting equipment focused on precision, efficiency, and reliable production for industries including energy solutions, packaging, and medical and pharmaceutical applications.

About Jagenberg Converting Solutions GmbH

Jagenberg Converting Solutions GmbH is part of Jagenberg Group and is a premier provider of innovative and sustainable solutions for cutting-edge web-converting applications including batteries, fuel cells, electrolyzers, and energy storage.
